

# From Capture to Care. Defensible Risk Adjustment.

One platform.

Retrospective + Prospective. Powered by Neuro-Symbolic AI.

## WHAT RAAPID DELIVERS — BY ROLE

### CMO / MEDICAL DIRECTOR

*"Will this help my clinicians or burden them?"*

- > Pre-visit summaries prep the care team in minutes
- > Care gaps surfaced during the visit, not after
- > 4+ hrs saved per provider weekly, zero workflow disruption

### VP OF RISK ADJUSTMENT

*"Can I defend every code we submit?"*

- > Two-way coding: adds AND deletes, not add-only
- > 100% MEAT evidence trail on every code
- > 8-12 min reviews, meet every CMS sweep deadline

### CFO

*"What's the real ROI on our VBC contracts?"*

- > 40%+ operational cost reduction
- > MACC credit eligible on Azure Marketplace
- > Find missed codes, flag what's unsupported

### CIO / CTO

*"Is this secure and easy to deploy?"*

- > Your Azure tenant: PHI never leaves your firewall
- > HITRUST, SOC 2, HIPAA, EHR agnostic
- > Live in 2-4 weeks, minimal IT resources

## POWERED BY NEURO-SYMBOLIC AI

### Not an NLP

No hallucination risk

### MEAT Validation

Every code linked to proof

### Decision Support

Clinicians retain authority

### Enterprise-Grade

Auditable and governable

## BY THE NUMBERS

**99%+**

FINAL CODING ACCURACY

**60-80%**

PRODUCTIVITY GAIN

**7X+**

EXPECTED ROI

**4+ hrs**

SAVED PER PROVIDER WEEKLY

## TWO SOLUTIONS, ONE PLATFORM

### PROTECT

#### Retrospective Risk Adjustment

*Surface every code. Defend every code.*

- > Two-way coding (adds + deletes)
- > 100% MEAT evidence trail
- > Glass-box AI, audit preparedness
- > Provider documentation pattern insights

### GROW

#### Prospective Risk Adjustment

*Confirm conditions at the point of care.*

- > Pre-visit summaries from 2+ years of data
- > In-visit decision support, not coercion
- > Care gap closure at the encounter
- > Provider-friendly, minimal clicks

## FIX THE ROOT CAUSE, NOT JUST THE CODES

#### Leverage AI-Driven Insights

- > Identifies documentation gaps
- > Education based on real patterns
- > Fewer post-visit queries back to providers

#### Better Documentation, Better Care

- > Documentation quality improves over time
- > Reduced provider abrasion, increased clinical trust
- > Chronic conditions captured accurately across encounters

## ENTERPRISE DEPLOYMENT

**Your Azure Tenant**  
PHI behind your  
firewall

**EHR Agnostic**  
All major systems

**2-4 Week Deploy**  
Minimal IT lift

**MACC Eligible**  
Use Azure  
commitments

# Surface Every Code. Defend Every Code.

Defensible. Explainable. Audit-Ready.

RAAPID's Retrospective Risk Adjustment Solution Powered by Neuro-symbolic AI provides the "why" and "where" behind every code.

## YOUR CURRENT RETROSPECTIVE PROGRAM

-  **Add-only creates audit exposure**  
One-way coding is now a DOJ red flag
-  **No evidence trail**  
Can't prove why a code was assigned
-  **40+ minutes per chart**  
Coder burnout, missed sweep deadlines
-  **Opaque AI decisions**  
Can't explain recommendations to auditors

VS

## RAAPID'S RETROSPECTIVE SOLUTION

-  **Two-way: ADDS AND DELETES**  
Finds missed codes, removes unsupported ones
-  **100% MEAT evidence trail**  
Every code linked to clinical proof
-  **8-12 minutes per chart**  
Neuro-Symbolic AI: traceable, explainable, no hallucinations.
-  **Glass-box explainable AI**  
Every recommendation fully traceable

## POWERED BY NEURO-SYMBOLIC AI

**Neural Networks**  
Pattern recognition

+

**Knowledge Graphs**  
Clinical reasoning

=

**Glass-Box AI**  
Explainable · Defensible

## DOCUMENTATION FAILURE THAT NEURO-SYMBOLIC AI FLAGS

### History-of coded as active

"History of diabetes" without current management evidence

### Single-occurrence high-risk codes

Stroke, MI, acute conditions without supporting encounters

### Wrong provider credentials

Notes signed by RN or MA, not qualifying MD/DO/NP/PA

### Problem list without A&P support

Diagnoses in problem list only, no Assessment & Plan

*"No amount of NLP tuning bridges the defensibility gap."*

## Multi-State Health Plan

**\$3M**

Additional revenue captured

**99.1%**

Final Coding accuracy

**<2 wks**

Project completion

*We are impressed with RAAPID's findings and ability to customize as per our guidelines with a quick turnaround time. Our coders liked the SaaS platform and were able to do the final review of the remaining charts.*

- Director of Operations,  
Multi-State Health Plan

### BENEFITS OF RAAPID'S NEURO-SYMBOLIC AI

**100%**

MEAT evidence trail  
for every code

**5X**

Productivity  
improvement

**Charts in Days, Not Months**

Meet every CMS sweep deadline. Process volume in days, not submission cycles.

**<8 min**

Per chart  
review

**40%+**

Operational  
cost saving

**Fix the Root Cause**

AI identifies provider documentation patterns. Drive targeted education, not just coding fixes.
